

Bench Scale 300kg x 20g (d = 20g) with 420x520 mm platform and IP65 indicator in sturdy ABS housing

18562040

This is our new, reliable floor and bench scale for warehouses, production and logistics, where durability and precision are essential. The series is available with capacities of 60 kg or 300 kg and with a resolution of either 15.000d or 3.000e.

The scale is built with a robust base in painted steel and aluminum and a solid stainless steel weighing plate (420 × 520 mm). The clear LCD indicator is placed in a strong ABS housing and has 52 mm high digits with white LED lighting, making the measurements easy to read, even from a distance.

The indicator contains a built-in, rechargeable lead-acid battery (6V/4Ah), which provides up to 70 hours of continuous operation, and can also be connected to constant power via the included AC adapter. With functions such as checkweighing with sound and light signal (Hi-Low-Ok), accumulation and counting function, the scale is a strong choice for portioning, classification and checkweighing.

Key Features

- Capacity: 60 kg or 300 kg
- Resolution: 15000d or 3000e
- Display: 52 mm LCD with LED backlight in ABS housing
