

## Counting Scale 6 kg x 2 g (e = 2 g) with 230x300 mm platform and rechargeable battery

18561320M

This advanced counting scale is designed for production and warehouse management, where precise counting of components, for example, is essential. With a division of up to 30000d, the scale ensures accurate results – even for small parts.

The scale is equipped with three separate LCD displays (weight, reference weight and total), which gives the user a quick and clear overview. Functions such as automatic reference weight optimization, pre-tare (PRE-TARE) and audible fill-to-target alarm increase the efficiency of counting work.

The robust weighing plate of 230×300 mm makes the scale suitable for both small and large items. The scale is supplied with both an AC adapter and a built-in rechargeable lead-acid battery (6V/4Ah), which provides up to 70 hours of operating time and the option of mobile counting. The counting scale is therefore particularly suitable for production, warehouse, logistics and quality control.

Key features:

- Capacity: 3 kg, 6 kg, 15 kg and 30 kg
- Division: 30000d or 3000e
- Operating time: Up to 70 hours with battery
- Three large backlit displays (20 mm digits)
- RS-232 interface for PC or printer (optional)

### Product details

Item no. 18561320M

### EAN

Customs tariff 8423822000

Sales Quantity 1

### Product specifications

Barcode 5708004109617

Accuracy 2 g

Battery Lead Acid 6V/4,0 Ah

Product name Counting Scale 6 kg x 2 g (e = 2 g) with 230x300 mm platform and Li-Ion Battery

Capacity 6 kg

Division 2 g

Minimum weight 40 g

Display type LCD

Pan size 230 x 300 mm

Product type Counting Scale

Class Klasse III

Readability 2 g

Calibration Yes – option at an additional cost

Verification Yes – option at an additional cost

Gross weight 4.600 kg

Net weight 3.800 kg
