

Precision bore gauge 10-18x0,01 mm with dial indicator

10273420

A dial bore gauge is a special tool which is used to accurately measure the inside diameter of a hole, cylinder or pipe.

In conjunction with a micrometer, a bore gauge will give you the exact reading of a bore size. A typical bore gauge is comprised of a shaft with a dial indicator at the top and a measuring sled at the base.

The measuring sled consists of three guides and an actuating plunger. Dial bore gauges give you quick and accurate readings on the size, less than perfect roundness or wear.

Product details

Item no.	10273420
EAN	5708004011477
Customs tariff	9017300000
Sales Quantity	1

Product specifications

Barcode	5708004011477
Resolution	0,01 mm
Measuring depth	100 mm
Measuring range	10-18 mm
Gross weight	0.540 kg
Net weight	0.540 kg
