

Precision bore gauge 18-35x0,01 mm with dial indicator

10273430

A dial bore gauge is a special tool which is used to accurately measure the inside diameter of a hole, cylinder or pipe.

In conjunction with a micrometer, a bore gauge will give you the exact reading of a bore size. A typical bore gauge is comprised of a shaft with a dial indicator at the top and a measuring sled at the base.

The measuring sled consists of three guides and an actuating plunger. Dial bore gauges give you quick and accurate readings on the size, less than perfect roundness or wear.

Product details	
Item no.	10273430
EAN	5708004011484
Customs tariff	9017300000
Sales Quantity	1

Product specifications	
Barcode	5708004011484
Resolution	0,01 mm
Measuring depth	135 mm
Measuring range	18-35 mm
Gross weight	0.900 kg
Net weight	0.900 kg
