

Bore Gauge 20-200 mm with dial indicator

10273200

A dial bore gauge is a special tool which is used to accurately measure the inside diameter of a hole, cylinder or pipe. In conjunction with a micrometer, a bore gauge will give you the exact reading of a bore size.

A typical bore gauge is comprised of a shaft with a dial indicator at the top and a measuring sled at the base.

The measuring sled consists of three guides and an actuating plunger. Dial bore gauges give you quick and accurate readings on the size, less than perfect roundness or wear.

Incl. dial indicator 0-3 mm, fitted with tungsten carbide balls, for clamping shaft 8 H6. Digital indicators also fit this bore gau

- Depth Ø20 - 50 mm: 105 mm
- Depth Ø50 - 200 mm: 290 mm

Product details

Item no. 10273200

EAN

Customs tariff 9017300000

Sales Quantity 1

Product specifications

Barcode 5708004004042

Measuring range 20-200 mm

Resolution 0,01 mm

Accuracy $\pm 0,020$ mm

Measuring depth 105 mm / 290 mm

Screws 3

Gross weight 1.100 kg

Net weight 0.570 kg
