

Digital BARCOL Hardness tester for aluminum (0-100 HBa)

15252560

The 934-1 S digital Barcol impressor is characterized by a balanced positioning device and a hardness value digital display with good stability, convenient calibration and high detection accuracy.

Besides the Barcol hardness, the Brinell hardness number (HB), Vickers hardness number (HV), Webster's hardness number (HW) and Rockwell hardness number (HRB/HRE/HR11/HRH) of the material all can be measured.

- Small and light.
- One hand operation.
- Wide range of tests (brinell hardness 25~ 130HBW).
- No support required and therefore also suitable for testing very large and thick workpieces.
- With the function of maximum holding, it can record the maximum hardness value during measurement.
- Function of calculating the average value of up to 29 groups of data.
