

KAPRO Prolaser 862G Cross beam laser (GREEN)

10468200

Indoor cross laser with horizontal, vertical and crossing laser beams with a spread of 180° for perfect marking. Prolaser 862 is self-levelling, and if the distance is too large for self-levelling, the laser flashes strongly to avoid errors.

In addition to horizontal and vertical lines, you can also make straight lines at oblique angles. It is useful, e.g. when measuring for stairs and handrails. With V-grooves and Neodymium magnets, the strongest grip is ensured for any metal surface.

Delivered with bag and a Velcro strap.

Battery: 2xAA included.

Perfect for the following work areas:

- Tiling
- Cabinet assembly
- Curtain suspension
- DIY projects and decorative work
 - Vertical, horizontal and/or cross lines
 - Indoor laser range: 20m
 - Accuracy: 0.4mm/m
 - Self-leveling range: $\pm 3^\circ$
 - Manual function for angular layout/oblique surveying
 - Visual "out of range" warning
 - Stand ready: 1/4" thread
 - V-groove
