

SHINE P-SH200 air hood (short) incl. PAPER unit, lightweight respiratory and face protection

32303220

SHINE P-SH200 + PAPER is a complete, lightweight short hooded powered air purifying respirator (PAPER) system designed for professional use in dusty and light chemical environments where no toxic gases are released and no mechanical face protection is required. In combination with the SHINE PAPER blower unit, the system achieves the highest EN 12941 classification TH3 P R SL, providing a very high level of protection against airborne particles and aerosols.

The short, white AIR hood covers head and face and is manufactured from non-woven material with PU coating. The wide visor with anti-fog coating ensures clear visibility for process, inspection and handling tasks. Low weight, the absence of breathing resistance and a stable airflow from the PAPER unit make the set suitable for full-shift use in applications such as food processing, agriculture, laboratories and surface treatment.

Features

- Lightweight respiratory and face protection for dust and light chemical environments
- No breathing resistance thanks to powered airflow from the PAPER blower
- Wide visor with anti-fog coating for reliable vision
- Three adjustable airflow levels: approx. 170 / 200 / 230
