

SHINE SPARX Single PAPR grinding and welding helmet with flip-up welding window and TH3 powered air

32303510

The SHINE SPARX Single + PAPR is a complete respiratory protection system for professional welders and grinding operators working in dusty environments who want reliable protection with reduced breathing resistance. The set combines a SPARX Single helmet with a clear main visor for grinding and a flip-up welding window for welding tasks with a high-performance TH3 class PAPR unit.

It is a strong choice for users who prefer a passive, fixed-shade concept instead of an auto-darkening filter. The soft flame-retardant face seal and the carrying system make it comfortable for all-day use in workshops, production and site work.

Features and benefits

- Multi-purpose platform for grinding, cutting and welding
- Clear main visor provides a wide view for grinding, fitting and assembly work
- Flip-up welding window enables fast switching between tasks
- TH3 PAPR supplies a steady flow of filtered air to the helmet, reducing heat and dust discomfort during long shifts
