

SHINE SPARX Single Prepared for Air welding and grinding helmet with flip-up visor

32304210

SHINE SPARX Single Prepared for Air is a lightweight, multi-purpose welding and grinding helmet built for users who want one platform for several disciplines. You get a large clear grinding view and a flip-up solution that lets you add welding protection when needed.

Not every welder wants an auto-darkening filter. SPARX Single is designed as a practical fixed-shade alternative, where you can combine inner and outer visors to achieve the required DIN shade for welding. A soft, flame-retardant face seal keeps the helmet comfortable for extended wear.

“Prepared for Air” means the helmet is pre-configured for use with a PAPR system. The PAPR unit, hose, belt/harness and filters are not included and must be ordered separately. When used with an EN 12941 TH3 approved PAPR system, the rated particle filtration applies to the supplied breathing air.

Features and benefits

- Multi-functional helmet for grinding, cutting and welding
- Flip-up solution for fast change between clear view and welding protection
- Alternative to auto-darkening ADF for users who prefer fixed shade
