Sound Level Meter 30 – 130 dB

15098560

Prof. sound level meter with 2 different filter curves A or C and many other features: Quick (fast) sound recording is used when you want to see rapid sound peaks. The slow mode gives a stable measurement result of sound that varies or pulses.

The sound can be read instantaneously or gives a mean value under a selected time period, from 10 sec to 24 hours. Integrated memory for 30 measurements. Registration of max. value. Alarm function which indicates with a LED when the sound level is above
