

## Transformer 30W for DC 12V LED machine light

50531955

12V DC LED driver / transformer with constant voltage.

Use this transformer if you need to transform (change) 230V to 12V DC low voltage.

When you need to find the right LED Driver / Transformer, it is important that you are aware that the power (number of watts) on the driver is greater than the total power of the number / LEDs to which voltage is applied. The driver / transformer in question can withstand a load from 5W to a maximum of 30W - this means that the power of the connected bulb (s) must not be below 5W and not above 30W.

- Specifications: 5W-30W constant
- Primary connection: 200-240V AC constant
- Secondary connection: 12V DC constant output
- Without dimming
- Voltage range (V): 198-264 VAC
- Ambient temperature: -15 °C - +45 °C
- IP enclosure class: IP20

### Product details

Item no. 50531955

### EAN

Customs tariff 8539520000

Sales Quantity 1

### Product specifications

Barcode 5708004064121

Gross weight 0.240 kg

Net weight 0.240 kg
