

TSCHORN 3D Tester SLIMplus IP67 with Ø12 mm shank (Analogue, WHITE dial disc)

50329525

A sleek and attractive design combined with high precision provides a quick and easy determination of the workpieces zero points and lengths. Scanning can be performed in all axis directions (X, Y, Z) with identical resolution. As soon as the cursor shows "0", the spindle axis is exactly on the workpiece edge.

The protection of the measuring unit itself is of the highest priority, which is why a complete and effective protection system is built into the 3D key.

The probe has a breakpoint mounted near the top. If the probe is damaged under the influence of great force, an affordable repair is possible.

- Analogue
- With Ø12 mm shank
- Axis directions (X, Y, Z)
- White dial disc
- Resolution: 0.01 mm
- Waterproof IP67
