

## TSCHORN Coaxial centering indicator with measuring range Ø0-Ø110 mm with Ø12 mm shank

50329440

TSCHORN CO-AX Centering device is a precision measuring device specially designed for centering and measuring the diameter of round objects. The device is used in industry for precision machining, quality control and assembly applications where accurate centering and dimensioning of components is essential.

Features:

- **Measuring range:** The center device has a wide measuring range that extends from Ø0 to Ø110 mm. It allows measuring the diameter of a wide range of round objects of different sizes.
- **Shaft diameter:** The device is equipped with a Ø12 mm shaft, which is used to insert and center the round object. The shaft is robust and reliable, so it can fix the object securely during measurement and processing.
- **Centering mechanism:** Center the device has a precise centering mechanism that allows you to adjust the object so that its center corresponds exactly to the center of the device. This ensures that the object is precisely positioned for correct measurement and processing.
- **Scale and readout:** The device is equipped with a scale or a
